

Guillermo Morán Lihaut

About me

I am someone who believes in punctuality and commitment. I practice high standards of honesty and hard work. I am old school. I believe on continuing education and self-improvement. I like to contribute to the generation of a pleasant work environment. I believe teamwork is the way to go.

Experience

I have 4 years of experience in software development with a focus on web technology. The past 3 years I have been working on web apps developed with Angular in the frontend and node / nest js in the backend. I have been working with the architecture of micro services made with Python and Oracle as a database. I have been debugging, improving and developing code from scratch. I like this architecture because is solid and easy to understand and mantain. I'm excited about the opportunity to bring my skills to your company and learn new ones. Thank you for considering my application.

— I'm looking forward to discussing how I can contribute to your team. —
